JX 2-180 K20 NT20 (Ex)

Electric - Qmax 50 m³/h - 833 l/min (220 USgpm) - Hmax 38 m (124 ft) Code not yet assigned

Indicative picture of the product

Product Data

Suction port

Threaded - 2" ISO 228 (BSP)

Delivery port

Threaded - 2" ISO 228 (BSP)

50 m³/h - 833 l/min (220 USgpm)

Hmax

38 m (124 ft)

Solids handling

15 mm (0.6")

Motor power

5,5 kW - 7,5 HP

Motor type

IEC standard

Cast iron frame

Motor brand

CEMP

Weight

Benefits

4) Wear plate

impeller

front to the impeller

5) Easy maintenance

1) Rapid self-priming

3) Semi-open impeller

2) High resistance

175 kg (385 lb)

Close-coupled self-priming centrifugal pump with electric motor

Characteristics

The J series self-priming centrifugal pumps are used in applications where a rapid priming capacity is required from demanding suction heights combined with the ability to transfer and manage polluted fluids, dirty and abrasives with suspended large diameter solids. The system is based on an inspectable pump casing which also acts as a water tank allowing a first quick priming without auxiliary systems, simplifying management of the system and reducing the time for maintenance. Within the physically permitted suction height limits, J pumps are a more comfortable and reliable solution than submersible pumps and vertical submersed impeller pumps. JX pumps include a thermocouple for back-sealing quench fluid temperature measurement. The pumping units in accordance with Directive 2014/34 / EU, have the following identification marking:

(€ (Ex) II 2/2 G Ex IIB T5...T3 Gb X

Applications

Industry:

clean, dirty, sandy, muddy, neutral, alkaline, acidic liquids; low viscous petroleum products, solvents even if dirty; milk of lime, caustic soda; washing, cooling, recirculation, smoke scrubbing.

Treatment:

pumping polluted corrosive wastewater containing sand, mud or solids in suspension; dosing neutralizing liquids; pumping out settled sludge.

loading and unloading; bilge pumping; washing, firefighting, stripping, sanitary duty and circulation.

Agriculture:

Without foot valve up to a height of 7.5 m (24.5 ft)

To abrasive liquids which are turbid and sandy

Easily replaceable stainless steel wear plate,

Removable front cover for direct access to the

High thickness casting impact resistant

surface irrigation; liquid manure oxygenation; transfer and spraying liquid manure or fertilizers; distribution of liquid animal feed; transfer of wine must; washing.

Varisco S.r.I. has certified its Quality, Environment and Safety Management System in accordance with the requirements of the international standard ISO 9001-14001-45001, recognized by the Lloyd Register.

JX 2-180 K20 NT20 (Ex)

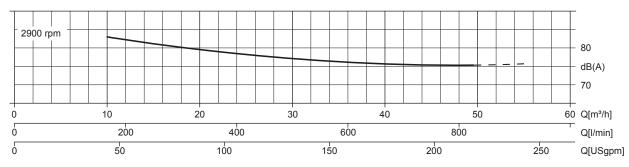

PERFORMANCE CURVES

Test according to UNI EN ISO 9906 standard - level 2B Test liquid: clean water, density 1.000 kg/m³ Spherical solids handling: D.15 mm (0.6")

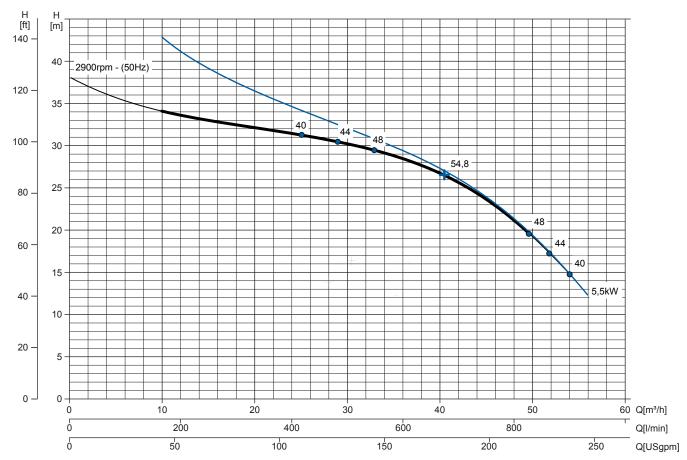

Priming time (2,900 rpm): **26s from 1,5 m (5 ft)** Installed power: **5,5 kW - 7,5 HP (2900 rpm)**

Noise Curve

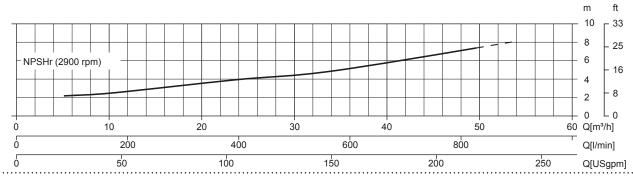

dB(A)=max noise level at 1 m

TECHNICAL DATA

Pump

Pump model	J2-180	
Qmax [2,900 rpm]	50 m³/h - 833 l/min (220 USgpm)	
Hmax [2,900 rpm]	38 m (124 ft)	
Suction port	Threaded - 2" ISO 228 (BSP)	
Delivery port	Threaded - 2" ISO 228 (BSP)	
Impeller type	Semi-open, 4 vanes	
Solids handling	15 mm (0.6")	
Casing	ASTM A351 CF3M stainless steel	
Impeller	ASTM A351 CF3M stainless steel	
Wear plate	ASTM A351 CF3M stainless steel	
Non-return valve	Check-valve, PTFE	
Shaft	SAF 2205 stainless steel	
Mechanical seal	Silicon carbide / Silicon carbide	
Elastomers	PTFE	
Lubrification	Liquid	
Thermocouple	"J" type - Temperature range from 0° up to 300°C	
Oiler	Glass - Capacity 140 cc	

Motor

Arrangement

Model	Close-coupled N	
Dimensions	382 x 866 x 483 mm (15 x 34 x 19")	
Coating	Polyurethane enamel, average thickness of 100 μm	
Color	RAL 5010 blue (standard)	
Features	Close-coupled with rigid coupling "N"	
Height connection	0,3 mm (13")	

Optionals

Flanged ports DN50 PN16 EN1092-1 Type B	cod. 10042790	
Flanged ports 2" ANSI B16.1 Class 125 R.F.	cod. 10042826	

Weight
