## J

### Self-priming centrifugal pumps

The J series self-priming centrifugal pumps are for applications where the main feature is the **difficulty in priming**: even with suction heights of several meters the machine quickly evacuates the air from the suction pipe and starts pumping. Furthermore, compared to other pumps, the **semi-open impeller** makes the J suitable for pumping liquids with **solids** in suspension.

### Optionals

2" NPT threaded ports  
DN 50 EN 1092-1 flanged ports  
ANSI B16.5 flanged ports  
Automatic lubrication system with grease cartridge
