Close-coupled self-priming centrifugal pump with electric motor

Characteristics

The J series self-priming centrifugal pumps are used in applications where a rapid priming capacity is required from demanding suction heights combined with the ability to transfer and manage polluted fluids, dirty and abrasives with suspended large diameter solids. The system is based on an inspectable pump casing which also acts as a water tank allowing a first quick priming without auxiliary systems, simplifying management of the system and reducing the time for maintenance. Within the physically permitted suction height limits, J pumps are a more comfortable and reliable solution than submersible pumps and vertical submersed impeller pumps. JX pumps include a thermocouple for back-sealing quench fluid temperature measurement. The pumping units in accordance with Directive 2014/34 / EU, have the following identification marking:

(E (Ex) II 2/2 G Ex IIB T5...T3 Gb X

Applications

Industry:

clean, dirty, sandy, muddy, neutral, alkaline, acidic liquids; low viscous petroleum products, solvents even if dirty; milk of lime, caustic soda; washing, cooling, recirculation, smoke scrubbing.

Treatment:

pumping polluted corrosive wastewater containing sand, mud or solids in suspension; dosing neutralizing liquids; pumping out settled sludge.

Benefits

1) Rapid self-priming Without foot valve up to a height of 7.5 m (24.5 ft)

2) High resistance To abrasive liquids which are turbid and sandy

3) Semi-open impeller High thickness casting impact resistant

4) Wear plate

Easily replaceable cast iron wear plate, front to the impeller

5) Easy maintenance

Removable front cover for direct access to the impeller

Naval:

loading and unloading; bilge pumping; washing, firefighting, stripping, sanitary duty and circulation.

Agriculture:

surface irrigation; liquid manure oxygenation; transfer and spraying liquid manure or fertilizers; distribution of liquid animal feed; transfer of wine must; washing.

Varisco S.r.I. has certified its Quality, Environment and Safety Management System in accordance with the requirements of the international standard ISO 9001-14001-45001, recognized by the Lloyd Register.

Motor

Mains supply (Three-phase)	220 VD/380 VY ± 5%	230 VD/400 VY ± 5%	240 VD/415 VY ± 5%
Frequency (Nominal speed)		50 Hz ± 2% / 2,900 rpm	
Absorbed current	7,5 A (Y)	7,27 A (Y)	7,03 A (Y)
Starting Current Is/In	7.4	7.7	8
Efficiency (100%)	88,1% (IE3)	88,1% (IE3)	88,1% (IE3)
Model		CEMP	
Standards		IEC 60034-1	
Construction		Cast iron, TEFC	
Mounting arrangement		IM 2101 B34	
No. poles		2	
Rated power		4 kW - 5,5 HP	
Degree of protection		Ex-db IIB T4 Gb / IP55	
Markings		CE	
Insulation class/Temperature		F/80°K	
Duty type		Continuous - S1	
Temperature sensors		PTC, available as option	

Arrangement

Model	Close-coupled N
Dimensions	310 x 804 x 470 mm (12 x 31 x 18")
Coating	Polyurethane enamel, average thickness of 100 µm
Color	RAL 5010 blue (standard)
Features	Close-coupled with rigid coupling "N"
Height connection	0,3 m (12")

Optionals

Flanged ports DN80 PN16 EN1092-2 Type B	
Flanged ports 3" ANSI B16.1 Class 125 R.F.
