Close-coupled self-priming centrifugal pump with electric motor

Characteristics

The J series self-priming centrifugal pumps are used in applications where a rapid priming capacity is required from demanding suction heights combined with the ability to transfer and manage polluted fluids, dirty and abrasives with suspended large diameter solids. The system is based on an inspectable pump casing which also acts as a water tank allowing a first quick priming without auxiliary systems, simplifying management of the system and reducing the time for maintenance. Within the physically permitted suction height limits, J pumps are a more comfortable and reliable solution than submersible pumps and vertical submersed impeller pumps.

Benefits

1) Rapid self-priming

Without foot valve up to a height of 7.5 m (24.5 ft)

2) High resistance

To abrasive liquids which are turbid and sandy

3) Semi-open impeller

High thickness casting impact resistant

4) Wear plate

Easily replaceable cast iron wear plate, front to the impeller

5) Easy maintenance

Removable front cover for direct access to the impeller

Applications

Industry

clean, dirty, sandy, muddy, neutral, alkaline, acidic liquids; low viscous petroleum products, solvents even if dirty; milk of lime, caustic soda; washing, cooling, recirculation, smoke scrubbing.

Treatment:

pumping polluted corrosive wastewater containing sand, mud or solids in suspension; dosing neutralizing liquids; pumping out settled sludge.

Naval

loading and unloading; bilge pumping; washing, firefighting, stripping, sanitary duty and circulation.

Agriculture:

surface irrigation; liquid manure oxygenation; transfer and spraying liquid manure or fertilizers; distribution of liquid animal feed; transfer of wine must; washing.

Varisco S.r.I. has certified its Quality, Environment and Safety Management System in accordance with the requirements of the international standard ISO 9001-14001-45001, recognized by the Lloyd Register.

Model	WEG W22 Premium		
Standards	IEC 60034-1		
Construction	cast iron, TEFC		
Mounting arrangement	IM 2001 B35		
No. poles		2	
Rated power	11 kW - 15 HP		
Degree of protection	IP55		
Markings	CE, UL, CSA, EAC		
Insulation class/Temperature	F/80°K		
Duty type	Continuous - S1 Variable - suitable for inverter use (30-50 Hz)		
Temperature sensors	PTC, available as option		

Arrangement

Model	Close-coupled N
Dimensions	420 x 1015 x 533 mm (16 x 40 x 21")
Coating	Polyurethane enamel, average thickness of 100 μm
Color	RAL 5010 blue (standard)
Features	Close-coupled with rigid coupling "N"
Height connection	0,3 m (13")

Optionals

Flanged ports DN80 PN16 EN1092-2 Type B	cod. 10042784
Flanged ports 3" ANSI B16.1 Class 125 R.F.	cod. 10042819
