## Electric - Qmax 85 m³/h - 1416 I/min (374 USgpm) - Hmax 52 m (170 ft) Code 8381064072

## Product Data

Suction port
Threaded - 3" ISO 228 (BSP)
Delivery port
Threaded - 3" ISO 228 (BSP)
Qmax
$85 \mathrm{~m}^{3} / \mathrm{h}-1416 \mathrm{I} / \mathrm{min}(374$ USgpm)
Hmax
52 m (170 ft)
Solids handling
27 mm (1 ")
Motor power 11 kW - 15 HP
Motor type
IEC standard Winding for inverters Cast iron frame
Motor brand
WEG W22 Premium
Weight
185 kg

# Close-coupled self-priming centrifugal pump with electric motor 

## Characteristics

The $J$ series self-priming centrifugal pumps are used in applications where a rapid priming capacity is required from demanding suction heights combined with the ability to transfer and manage polluted fluids, dirty and abrasives with suspended large diameter solids. The system is based on an inspectable pump casing which also acts as a water tank allowing a first quick priming without auxiliary systems, simplifying management of the system and reducing the time for maintenance. Within the physically permitted suction height limits, J pumps are a more comfortable and reliable solution than submersible pumps and vertical submersed impeller pumps.

## Benefits

1) Rapid self-priming

Without foot valve up to a height of $7.5 \mathrm{~m}(24.5 \mathrm{ft})$
2) High resistance

To abrasive liquids which are turbid and sandy
3) Semi-open impeller

High thickness casting impact resistant

## 4) Wear plate

Easily replaceable stainless steel wear plate, front to the impeller

## 5) Easy maintenance

Removable front cover for direct access to the impeller

## Applications

## Industry:

clean, dirty, sandy, muddy, neutral, alkaline, acidic liquids; low viscous petroleum products, solvents even if dirty; milk of lime, caustic soda; washing, cooling, recirculation, smoke scrubbing.

## Treatment:

pumping polluted corrosive wastewater containing sand, mud or solids in suspension; dosing neutralizing liquids; pumping out settled sludge.

## Naval:

loading and unloading; bilge pumping; washing, firefighting, stripping, sanitary duty and circulation.

## Agriculture:

surface irrigation; liquid manure oxygenation; transfer and spraying liquid manure or fertilizers; distribution of liquid animal feed; transfer of wine must; washing.

Varisco S.r.l. has certified its Quality, Environment and Safety Management System in accordance with the requirements of the international standard ISO 9001-14001-45001, recognized by the Lloyd Register.

## PERFORMANCE CURVES

Test according to UNI EN ISO 9906 standard - level 2B Test liquid: clean water, density 1.000 kg/m³
Spherical solids handling: D. 27 mm (1 ")
Noise Curve

Priming time 2.900 rpm: 20s from 1,5 m (5 ft) Installed power: 11 kW - 15 HP (2.900 rpm)

Multiple Speed Curve

NPSHr Curve

JE 3-180 Q10 NT21
