ST-R6S F10 E

Qmax 365 m³/h - 6083 l/min (1607 USgpm) - Hmax 36 m (118 ft) Code 10026607

Indicative picture of the product

Self-priming centrifugal trash pump

Characteristics

The ST-R self-priming centrifugal pumps are used in applications where a rapid priming capacity is required from demanding suction heights combined with the ability to transfer and manage polluted fluids, dirty and abrasives with suspended large diameter solids. The system is based on an inspectable pump casing which also acts as a water tank allowing a first quick priming without auxiliary systems, simplifying management of the system and reducing the time for maintenance.

The ST-R pumps are designed to facilitate unclogging operation in the field and ensure easy maintenance and high levels of reliability. The front inspection cover can be used to access all internal parts without disconnecting the pipes and without removing the pump from the installation.

Product Data

Suction port Welding flange - 6" ANSI B16.5 Class 150 RF Delivery port Welding flange - 6" ANSI B16.5 Class 150 RF Qmax 365 m³/h - 6083 l/min (1607 USgpm) Hmax 36 m (118 ft) Solids handling 76 mm (3") Weight 370 kg (815 lb)

Benefits

1) Rapid self-priming Without foot valve up to a height of 7.5 m (24.5 ft)

High resistance
To abrasive liquids which are turbid and sandy

3) Semi-open impeller High thickness casting impact resistant

4) Wear plates Easily replaceable stainless steel wear plates

5) Easy maintenance Removable front cover for direct access to all internal parts complete with 1/2" 6 bar air release valve

6) Two separate oil chambers one for the mechanical seal and one for the bearings

Applications

Treatment:

pumping polluted corrosive wastewater containing sand, mud or solids in suspension; dosing neutralizing liquids; pumping out settled sludge.

Industry:

clean, dirty, sandy, muddy, neutral, alkaline; low viscous petroleum products; milk of lime, caustic soda; washing, cooling, recirculation, smoke scrubbing.

Agriculture:

surface irrigation; liquid manure oxygenation; transfer and spraying liquid manure or fertilizers; distribution of liquid animal feed; transfer of wine must; washing.

Varisco S.r.I. has certified its Quality, Environment and Safety Management System in accordance with the requirements of the international standard ISO 9001-14001-45001, recognized by the Lloyd Register.

ST-R6S F10 E PERFORMANCE CURVES

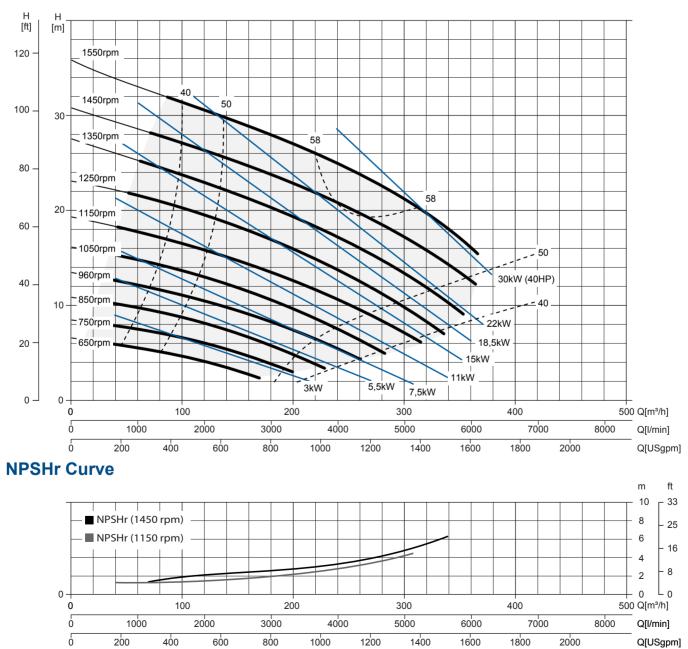

Test according to UNI EN ISO 9906 standard - level 2B Test liquid: clean water, density 1.000 kg/m³ Spherical solids handling: D.76 mm (3")

Priming time (1.450 rpm): **14 s (with a suction lift of 2 m)** Installed power: **30 kW - 50 Hz**

Noise Curve dB(A)=max noise level at 1 m 90 dB(A) (1450 rpm) 80 🔳 (1150 rpm) 0 0 100 200 300 400 500 Q[m³/h] б 2000 1000 3000 4000 5000 6000 7000 8000 Q[l/min] б 200 400 600 800 1000 1200 1400 1600 1800 2000 Q[USgpm]
