

A technician wearing a blue hard hat and safety glasses is working on a yellow industrial machine. He is holding a white container and pouring its contents into a component of the machine. The machine has a control panel with a digital display and buttons. The background is a blurred industrial setting.

Service offer for pumps

Servicing your equipment regularly by using genuine parts is crucial to increase your productivity and reduce your capital

Maintenance

- Preventive Maintenance Kits
 - Service packs
 - Multi pack kits
- Pump maintenance
 - Pump parts
- Consumables
 - Oil
 - Coolant
 - Grease

Digitalization

- Fleetlink
- Power Connect
- E-commerce

Service repair and machine overhaul

- Service repair
 - Seal kit
 - Instant service pak
 - Engine parts
 - Battery
- Machine overhaul
 - Wear part kit
 - Engine program

Every day, thousands of workers in construction, demolition and renovation projects around the world rely on Atlas Copco machines, products and services.

Reliability is a key factor, as time is precious and deadlines are tight. When conditions are tough, you need a partner you can trust. Atlas Copco Power Technique Service provides a first-class service, allowing you to minimize downtime and maximize productivity by having reliable machinery. Our tailor made service offer fully covers all your needs during the life time course of our product to keep your operating costs under control.

Our 24/7 Shop Online guarantees full accessibility to our genuine spare parts and consumables for daily operations. You can also count on our competent service technicians and service partners to ensure your equipment is running smoothly.

Original filters

Our original filters are the best way to ensure quality, as they are produced to the same demanding manufacturing standards as our original parts, and have passed our tough performance tests. Our original filters will offer the best possible sealing between the filter body and the engine, and the paper element inside the filter will last longer.

-  Air filter
-  Oil filter
-  Air-oil separator filter
-  Fuel filter

Pick the right lubricant

Every type of machine needs a specific lubricant, and that’s not all. To achieve maximum uptime, performance and equipment lifetime, the choice of lubricant will also depend on the application and ambient conditions.

Service paks

All-in-one box tailored to match your equipment. Our Preventive Maintenance Kits contain all the parts required for the equipment’s scheduled maintenance program. These kits are easy to obtain and attractively priced. When the repairs are carried out by one of our certified technicians, your machine can achieve maximum productivity.

Service paks	Service intervals	Kits - What is included
	250 h	Oil filter, Oil drain washer
	500 h	Oil filter, Fuel filter, Air filter, Oil drain washer, Fuel - pre filter* V-Belt*
	1000 h	Oil filter, Fuel filter, Air filter, Oil drain washer, Fuel - pre filter*, V-Belt*, Air filter safety cartridge*
	2000 h	Oil filter, Fuel filter, Air filter, Oil drain washer, Fuel - pre filter*, V-Belt*, Air filter safety cartridge*
	3000 h	Oil filter, Fuel filter, Air filter, Oil drain washer, Fuel - pre filter*, V-Belt*, Air filter safety cartridge*

Multi pack kits

Multi pack kits are the best solution when it comes to machine fleets that require tailored maintenance practices. Atlas Copco provides you the best and easy option with attractive quantities and prices.

Our Solution helps you to control and manage your maintenance budget, while ensuring protection of your investment.

- Saves time and money
- Perfect for large fleets of machinery
- High quality original parts
- 10% cheaper than the individual unit

**10
or
24
UNITS**

Atlas Copco multi pack kits:
Easy to order, Easy to obtain.

BUY MORE FOR LESS!

Pump parts

Atlas Copco pump parts such as for example wear and hydraulic parts are designed to withstand the toughest applications and ensure the promised performance.

Thanks to the material selection and optimized design, it increases the machine productivity while keeping the life cycle cost low.

- Wear resistant in toughest conditions
- Optimized design for minimized performance drop
- Low life cycle cost

Gasket kit

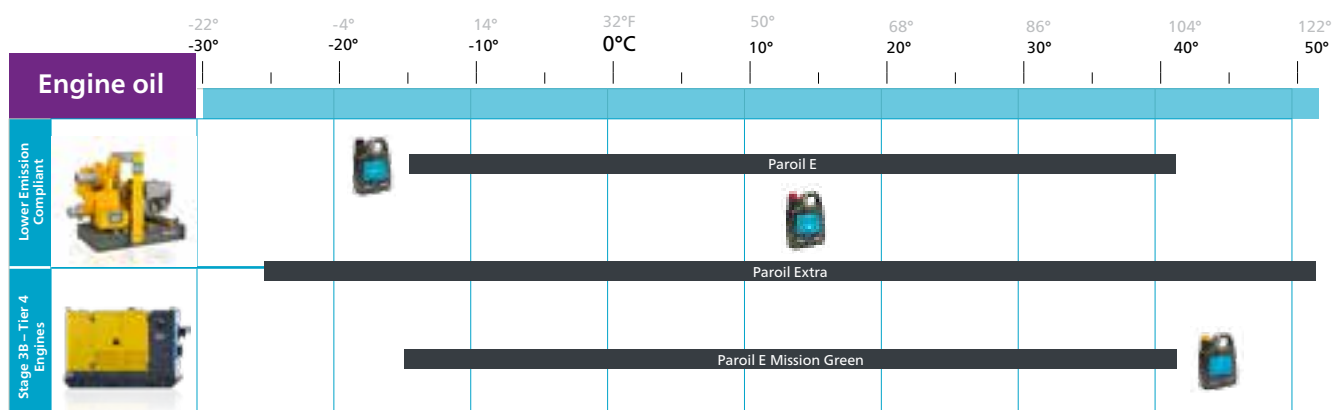

The gasket kit or O-Ring kit contains the proper selection of gaskets to reseal the pump casing after a service intervention like changing an impeller.

Moreover, the kit offers the price benefit against the individual items and is the ideal solution to prevent leakages after the service.

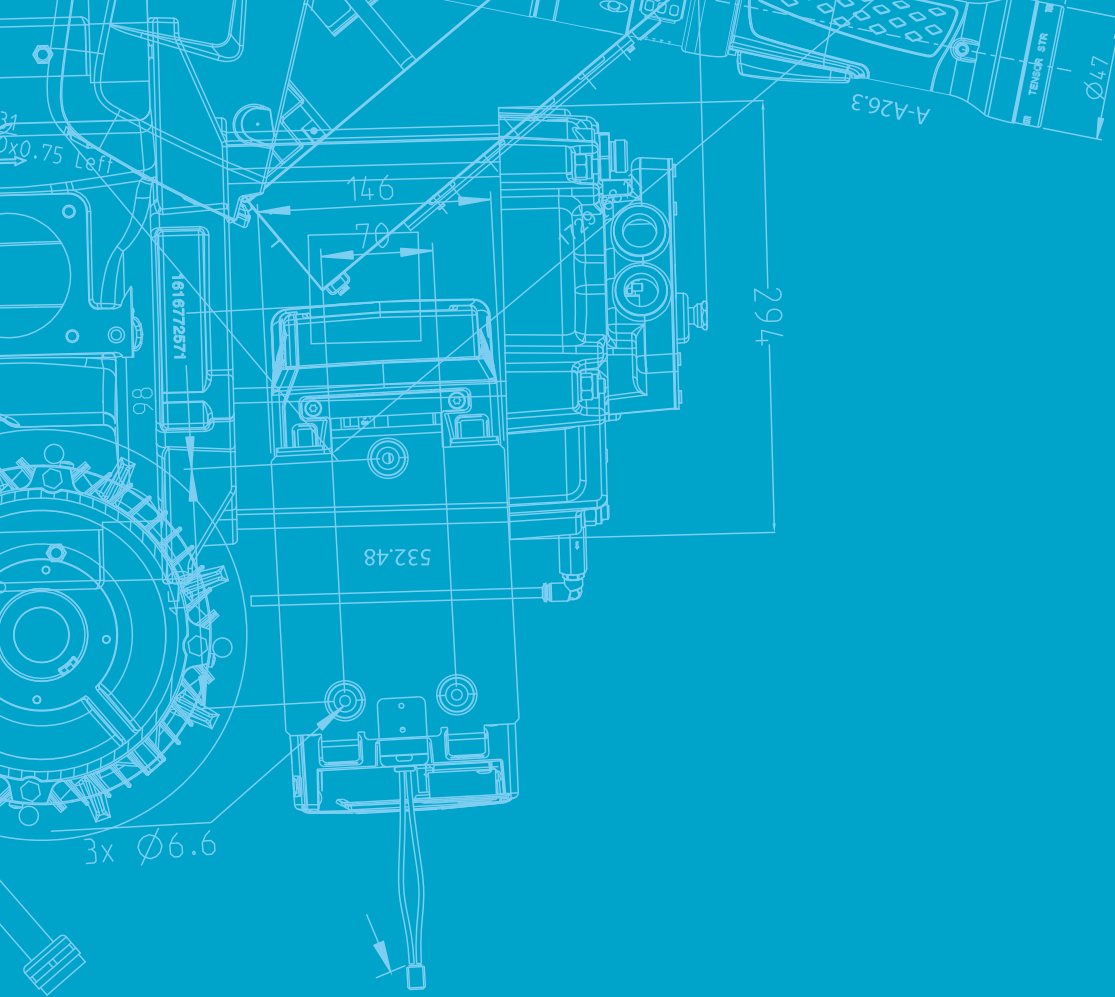

Fluids

Original lubricants are the best way to protect your machine investment, by both maximizing uptime and by improving the resale value of your equipment. Atlas Copco lubricants have been especially engineered for your compressor to match our maintenance specifications and therefore provide optimal protection for your products. Our lubricants last longer and perform better.

Service repair and
machine overhaul

Seal kits

The seal kit contains the following parts

- Mechanical shaft seal
- Gasket kit

The seal kit is the proper selection of components for a mechanical seal change to ensure trouble free operation after service.

The high quality mechanical seals and gaskets are well selected to meet the quality requirements and its foreseen lifetime.

The Seal kits are available for the complete pump range and offers a price benefit against the individual items.

Instant service pack

The instant service pack is a tailored service product for the submersible WEDA pump.

The instant service pack is a preassembled, tested and ready-to-use seal system containing the mechanical shaft seals, bearings, gaskets and oil to ensure trouble free operation. It offers a quick onsite repair due to ease of installation and reduces consequentially the machine downtime cost.

- Preassembled
- Tested
- Reduced downtime cost
- Onsite repair proven

Wear part kit

The wear part kit is a typical selection of components to bring the pump performance back to factory setup. It is the ideal solution for a machine overhaul or refurbishment.

The wear part kits are available for the complete pump range and offers a price benefit against the individual items

Wear part kit -
What is included

Impeller
Front wear plate
Wear plate gasket
Wear plate fixation

Shaft key
Impeller nut
Rear wearplate*

Engine program

Atlas Copco Power Technique Service offers a program that answers all your questions. We have developed a portfolio that enables you to choose wisely based on your needs. Take advantage of our competitive price agreements with the original OEM brands for new engines.

We offer three options:

New engines

**Reconditioned
engines**

**Long block
option**

If your engine model is no longer manufactured, we can provide you with a reconditioned model that performs just as good as new with warranty. If your engine suffers a major cylinder failure but all external parts are new, take advantage of the quicker, cheaper solution with our warranted long-block option!

Engine parts

Atlas Copco Power Technique service, offers a wide variety of original OEM brands peripheral engine spare parts, at very attractive prices. These parts are available to order via Shop Online. We offer a wide portfolio of engine critical parts that have been selected according to our product and engine experience gained over the years. We are the reliable partner you have been looking for to maintain your machine uptime and increase your productivity.

Batteries

Atlas Copco flooded lead acid batteries are developed to perform and last with low maintenance requirements under extreme conditions. Our batteries are built to perform and offer a number of advantages:

Our batteries are developed to lower your product cost of ownership, guarantee your machine uptime and increase your productivity.

FleetLink is an intelligent telematics system that helps optimize fleet usage, reduce maintenance cost, ultimately saving time and money. It allows you to manage your machines conveniently wherever you are, always having the latest fleet information at hand.

Fleetlink keeps you connected in an ever changing world, with state of the art digital monitoring tools. Remotely manage your machine fleet whether big or small. FleetLink keeps you connected to your job-site, machines and your team.

Getting connected is very easy! Fleetlink is comes with your machines as an option or can be retrofitted.
